Management Summary

1

Analytics graphics display placeholder and nonsensical text instead of real data

Page

<https://goc.searchchonic.online/revenue-cloud-implementation>

How to Fix

Replace dummy graphic labels with realistic business metrics and accurate terminology.

2

Illustration style conflicts with the photographic imagery used on the rest of the site

Page

<https://goc.searchchonic.online/agentforce-for-manufacturing>

How to Fix

Use a consistent visual style, choosing either real photography or illustrations across all pages.

3

Top navigation button and main hero button share identical colors, weakening visual hierarchy

Page

<https://goc.searchonic.online/>

How to Fix

Make the header button an outline style so the main consultation button stands out as the primary action.

4

Salesforce partner logo is displayed without context or trust credentials

Page

<https://goc.searchonic.online/>

How to Fix

Place the logo inside a dedicated partner badge with clear text indicating partner status.

5

About page introduces a sales pitch before explaining the company's background

Page

<https://goc.searchonic.online/about>

How to Fix

Update the top banner on the About page to highlight the company's mission and expertise before asking users to connect.

6

Primary action button labels are overly wordy and hard to scan

Page

Found on 4 pages

► [View affected pages](#)

How to Fix

Shorten the button text to concise, action-focused labels like 'Get Started' or 'Request a Consultation'.

7

Text and link colors do not have enough contrast against their background

Page

Found on 22 pages

► [View affected pages](#)

How to Fix

Darken text, button, and breadcrumb colors to ensure they are easy to read on light backgrounds.

8

Social media link to Facebook is broken

Page

Found on 22 pages

► [View affected pages](#)

How to Fix

Update the Facebook link with the correct profile address or remove the link if it is no longer active.

9

Pages take too long to display their main content

Page

Found on **22** pages

► [View affected pages](#)

How to Fix

Compress banner images, optimize file delivery, and prioritize loading visible content first.

10

Page content moves and shifts unexpectedly while loading

Page

Found on **22** pages

► [View affected pages](#)

How to Fix

Set fixed width and height dimensions on all images and reserve space for dynamic content.

11

Page file size is unusually heavy and takes extra time and data to download

Page

<https://goc.searchonic.online/revenue-cloud-for-manufacturing>

How to Fix

Compress large media files and remove unneeded assets to significantly lower page size.

12

Several links do not clearly describe where they lead

Page

Found on 22 pages

► [View affected pages](#)

How to Fix

Add descriptive text or accessibility labels to every link so users and screen readers understand their destination.

13

Pages are missing main content structural labels used by screen readers

Page

Found on 22 pages

► [View affected pages](#)

How to Fix

Add standard main content tags to the page layout so assistive technologies can navigate the content efficiently.

14

Interactive buttons and links are too small or closely packed for mobile users

Page

Found on 2 pages

► [View affected pages](#)

How to Fix

Increase the size and spacing of clickable buttons so mobile visitors can tap them without misclicking.

15

Section headings do not follow a logical order

Page

<https://goc.searchonic.online/revenue-cloud-for-manufacturing>

How to Fix

Structure page headings in sequential order from main headings down to subheadings.
