UI / UX Analysis

<https://searchonic.online/>

UI-001

Severity: Critical

Issue: Missing or Broken CSS Stylesheets

Recommendation: Fix stylesheet asset paths and ensure CSS files load correctly across all environments.

UI-002

Severity: Critical

Issue: Broken Image Assets and Placeholder Graphics

Recommendation: Update image asset URLs, optimize image paths, and provide appropriate fallback placeholders.

UI-003

Severity: Critical

Issue: Unreadable Low Contrast Dark Sections

Recommendation: Use high-contrast white or light-grey text colors on dark section backgrounds.

UI-004

Severity: High

Issue: Unformatted Navigation Bar

Recommendation: Apply flexbox/grid layout and CSS navigation styles to format links horizontally in a header header container.

UI-005

Severity: Medium

Issue: Visible Dummy Placeholder Copy

Recommendation: Replace all dummy filler copy with actual value propositions for the business.

<https://searchonic.online/about-us.html>

UI-006

Severity: Critical

Issue: 404 Page Not Found Error

Recommendation: Verify route configuration and upload the missing about-us.html file to the server root.

UI-007

Severity: High

Issue: Missing Custom Error Page and Navigation

Recommendation: Design a branded 404 error page with global navigation links and a search bar to preserve user retention.

<https://searchonic.online/home-interior-service.html>

UI-008

Severity: Critical

Issue: 404 Page Not Found Error

Recommendation: Create the home-interior-service.html template and link correct destination paths.

UI-009

Severity: High

Issue: Lack of Recovery CTA or Navigation Options

Recommendation: Implement a custom 404 layout including global navigation, contact info, and home page CTA button.

<https://searchonic.online/office-interior-service.html>

UI-001

Severity: Critical

Issue: Page returns a 404 Not Found error

Recommendation: Publish the page content or set up a 301 redirect to an active page.

UI-002

Severity: High

Issue: Missing site navigation and recovery options

Recommendation: Design a custom branded 404 page with persistent global navigation and primary recovery buttons.

UI-003

Severity: Medium

Issue: Lack of brand identification and trust signals

Recommendation: Apply company branding, company logo, and customer support links to maintain user trust.

<https://searchonic.online/restaurant-interior-service.html>

UI-001

Severity: Critical

Issue: Broken link / 404 HTTP Error

Recommendation: Restore the page content or configure a proper redirect to an active restaurant services page.

UI-002

Severity: High

Issue: Absence of call-to-action or navigation controls

Recommendation: Add a primary CTA button such as 'Back to Home' along with the main header menu.

UI-003

Severity: Medium

Issue: Unbranded error message

Recommendation: Replace default server error pages with a helpful, custom-designed 404 experience.

<https://searchonic.online/commercial-interior-service.html>

UI-001

Severity: Critical

Issue: Resource not found (404 Error)

Recommendation: Ensure the resource exists at this URL or redirect users to a relevant active page.

UI-002

Severity: High

Issue: Missing website header and footer navigation

Recommendation: Integrate the standard site template including header navigation and search functionality.

UI-003

Severity: Medium

Issue: Lack of visual branding and assistance

Recommendation: Add brand styling, helpful contact details, and links to popular service pages.

<https://searchonic.online/sample-house-interior.html>

UI-001

Severity: Critical

Issue: Broken Page Link (HTTP 404 Error)

Recommendation: Publish the target page content or configure a 301 redirect to an active URL.

UI-002

Severity: High

Issue: Missing Site Navigation and Header

Recommendation: Incorporate global website header and footer templates into the error page layout.

UI-003

Severity: High

Issue: Absence of Primary Call-to-Action

Recommendation: Add a prominent CTA button labeled 'Back to Home' or 'Explore Interior Samples'.

UI-004

Severity: Medium

Issue: Unbranded Server Default Page

Recommendation: Create a custom-designed 404 error page matching the brand's visual identity.

<https://searchonic.online/portfolio.html>

UI-001

Severity: Critical

Issue: Page Not Found (404 Error)

Recommendation: Restore the portfolio page file or update links pointing to this URL.

UI-002

Severity: High

Issue: Missing Navigation Menu

Recommendation: Maintain standard header navigation with links to key site sections across error states.

UI-003

Severity: High

Issue: Missing Call-to-Action

Recommendation: Provide a clear primary CTA button such as 'Return to Homepage' or 'Search Portfolio'.

UI-004

Severity: Medium

Issue: Lack of Brand Identity and Trust Signals

Recommendation: Style the 404 page using custom typography, logo, and helpful contact/search widgets.

<https://searchonic.online/contact-us.html>

UI-001

Severity: Critical

Issue: Inaccessible Contact Page (404 Error)

Recommendation: Ensure the contact-us.html template is correctly named and hosted on the server.

UI-002

Severity: High

Issue: Missing Direct Contact Fallback Information

Recommendation: Display direct contact details (e.g., email address and phone number) directly on custom error pages.

UI-003

Severity: High

Issue: No Actionable Navigation or CTA Button

Recommendation: Add a prominent button encouraging users to return to the home page or help center.

UI-004

Severity: Medium

Issue: Generic Server Error Message

Recommendation: Replace system default 404 message with human-centric, brand-aligned messaging.
