Problems & How to Fix

Performance — 16/100

Largest Contentful Paint

Result: 14.1 s

Why: The main visible content is taking 14.1 s to appear. A slow Largest Contentful Paint usually means the main image, heading, or other large element is loading too late.

How to fix: Optimize the main hero image, use WebP or AVIF, preload the LCP resource when appropriate, reduce render-blocking resources, and defer non-critical JavaScript.

Total Blocking Time

Result: 6,140 ms

Why: The browser is spending too much time executing long JavaScript tasks (6,140 ms). This delays user interaction.

How to fix: Reduce JavaScript execution, remove unused JavaScript, split large bundles, defer non-critical scripts, and reduce third-party JavaScript.

Cumulative Layout Shift

Result: 1.096

Why: Page elements are moving unexpectedly during loading (1.096). This can make the page difficult to use and can cause accidental clicks.

How to fix: Reserve space for images and advertisements, define width and height for media, avoid inserting content above existing content, and stabilize fonts before rendering.

Speed Index

Result: 4.5 s

Why: Visible page content is appearing slowly (4.5 s), so users may see an incomplete page for longer.

How to fix: Optimize above-the-fold images, reduce render-blocking resources, inline critical CSS, and defer non-critical assets.

Use efficient cache lifetimes

Result: Est savings of 17 KiB

Why: Lighthouse reported Est savings of 17 KiB for this audit, indicating that this check did not meet the recommended threshold.

How to fix: A long cache lifetime can speed up repeat visits to your page. [Learn more about caching]

(<https://developer.chrome.com/docs/performance/insights/cache>).

Affected Element:

Evidence: Est savings of 17 KiB

- <https://static.parastorage.com/unpkg-semver/fedops-logger@5/fedops-logger.bundle.min.js>

Layout shift culprits

Why: Lighthouse identified an issue with this page.

How to fix: Layout shifts occur when elements move absent any user interaction. [Investigate the causes of layout shifts]

(<https://developer.chrome.com/docs/performance/insights/cls-culprit>), such as elements being added, removed, or their fonts

changing as the page loads.

Duplicated JavaScript

Result: Est savings of 27 KiB

Why: Lighthouse reported Est savings of 27 KiB for this audit, indicating that this check did not meet the recommended threshold.

How to fix: Remove large, [duplicate JavaScript modules](https://developer.chrome.com/docs/performance/insights/duplicated-javascript) from bundles to reduce unnecessary bytes consumed by network activity.

Improve image delivery

Result: Est savings of 86 KiB

Why: Lighthouse reported Est savings of 86 KiB for this audit, indicating that this check did not meet the recommended threshold.

How to fix: Reducing the download time of images can improve the perceived load time of the page and LCP. [Learn more about optimizing image size](https://developer.chrome.com/docs/performance/insights/image-delivery)

Affected Element:

Evidence: Est savings of 86 KiB

- https://static.wixstatic.com/media/282ef0_49577ce71b394d1da77d3fd360995bff~mv2.jpg/v1/fill/w_640,h_480,q_90,enc_avif,quality_auto/282ef0_49577ce71b394d1da77d3fd360995bff~mv2.jpg
- https://static.wixstatic.com/media/282ef0_e36878464fd742c9b815b5f70472d674~mv2.jpg/v1/fill/w_640,h_480,fp_0.48_0.48,q_90,enc_avif,quality_auto/282ef0_e36878464fd742c9b815b5f70472d674~mv2.jpg
- `div#item-wrapper-6e1e7a58-fd5a-4070-b3a9-9a350f6a0049 > div.gallery-item-content > picture > img#6e1e7a58-fd5a-4070-b3a9-9a350f6a0049`
- `div > div#comp-kbjqiums > div.apPOZK > img#img_comp-kbjqiums`

LCP breakdown

Why: Lighthouse identified an issue with this page.

How to fix: Each [subpart has specific improvement strategies](https://developer.chrome.com/docs/performance/insights/lcp-breakdown). Ideally, most of the LCP time should be spent on loading the resources, not within delays.

Legacy JavaScript

Result: Est savings of 39 KiB

Why: Lighthouse reported Est savings of 39 KiB for this audit, indicating that this check did not meet the recommended threshold.

How to fix: Polyfills and transforms enable older browsers to use new JavaScript features. However, many aren't necessary for modern browsers. Consider modifying your JavaScript build process to not transpile [Baseline](https://web.dev/articles/baseline-and-polyfills) features, unless you know you must support older browsers. [Learn why most sites can deploy ES6+ code without transpiling](https://developer.chrome.com/docs/performance/insights/legacy-javascript)

Affected Element:

Evidence: Est savings of 39 KiB

- <https://browser.sentry-cdn.com/7.120.3/bundle.tracing.es5.min.js>

Network dependency tree

Why: Lighthouse identified an issue with this page.

How to fix: [Avoid chaining critical requests](https://developer.chrome.com/docs/performance/insights/network-dependency-tree) by reducing the length of chains, reducing the download size of resources, or deferring the download of unnecessary resources to improve page load.

Time to Interactive

Result: 16.6 s

Why: Lighthouse reported 16.6 s for this audit, indicating that this check did not meet the recommended threshold.

How to fix: Time to Interactive is the amount of time it takes for the page to become fully interactive. [Learn more about the Time to Interactive metric](https://developer.chrome.com/docs/lighthouse/performance/interactive/).

Max Potential First Input Delay

Result: 1,550 ms

Why: Lighthouse reported 1,550 ms for this audit, indicating that this check did not meet the recommended threshold.

How to fix: The maximum potential First Input Delay that your users could experience is the duration of the longest task. [Learn more about the Maximum Potential First Input Delay metric](https://developer.chrome.com/docs/lighthouse/performance/lighthouse-max-potential-fid/).

Reduce unused CSS

Result: Est savings of 20 KiB

Why: The page is downloading resources that are not fully used during the initial page load. This increases network and processing work.

How to fix: Remove unused code, split CSS and JavaScript by page or feature, defer non-critical resources, and load assets only when they are needed.

Affected Element:

Evidence: Est savings of 20 KiB

- `.s_3mb942.oUUTDb0--madefor{--wbu-font-stack:var(--wix-font-stack); ... } ...`

Reduce unused JavaScript

Result: Est savings of 272 KiB

Why: The page is downloading resources that are not fully used during the initial page load. This increases network and processing work.

How to fix: Remove unused code, split CSS and JavaScript by page or feature, defer non-critical resources, and load assets only when they are needed.

Affected Element:

Evidence: Est savings of 272 KiB

- <https://browser.sentry-cdn.com/7.120.3/bundle.tracing.es5.min.js>
- <https://static.parastorage.com/services/pro-gallery-tpa/1.1531.0/WixProGalleryViewerWidget.bundle.min.js>
- https://static.parastorage.com/services/wix-thunderbolt/dist/group_6.8440d58.chunk.min.js
- <https://static.parastorage.com/services/wix-thunderbolt/dist/motion.a51fa0ca.chunk.min.js>
- <https://static.parastorage.com/services/wix-thunderbolt/dist/main.209eb21d.bundle.min.js>

Avoid enormous network payloads

Result: Total size was 2,723 KiB

Why: Lighthouse reported Total size was 2,723 KiB for this audit, indicating that this check did not meet the recommended threshold.

How to fix: Large network payloads cost users real money and are highly correlated with long load times. [Learn how to reduce payload sizes](<https://developer.chrome.com/docs/lighthouse/performance/total-byte-weight/>).

Affected Element:

Evidence: Total size was 2,723 KiB

- <https://static.parastorage.com/services/pro-gallery-tpa/1.1531.0/WixProGalleryViewerWidget.bundle.min.js>
- https://www.tagteamsigns.com/_partials/wix-thunderbolt/dist/clientWorker.1179f420.bundle.min.js
- <https://www.tagteamsigns.com/>
- <https://browser.sentry-cdn.com/7.120.3/bundle.tracing.es5.min.js>
- <https://static.parastorage.com/services/pro-gallery-tpa/1.1531.0/WixProGalleryController.bundle.min.js>

Reduce JavaScript execution time

Result: 11.6 s

Why: Lighthouse reported 11.6 s for this audit, indicating that this check did not meet the recommended threshold.

How to fix: Consider reducing the time spent parsing, compiling, and executing JS. You may find delivering smaller JS payloads helps with this. [Learn how to reduce Javascript execution time](<https://developer.chrome.com/docs/lighthouse/performance/bootup-time/>).

Affected Element:

Evidence: 11.6 s

- <https://www.tagteamsigns.com/>
- Unattributable
- <https://static.parastorage.com/unpkg/react@18.3.1/umd/react.production.min.js>
- <https://static.parastorage.com/unpkg/requirejs-bolt@2.3.6/requirejs.min.js>
- https://static.parastorage.com/services/wix-thunderbolt/dist/group_2.910667fd.chunk.min.js

Minimize main-thread work

Result: 19.0 s

Why: Lighthouse reported 19.0 s for this audit, indicating that this check did not meet the recommended threshold.

How to fix: Consider reducing the time spent parsing, compiling and executing JS. You may find delivering smaller JS payloads helps with this. [Learn how to minimize main-thread work](<https://developer.chrome.com/docs/lighthouse/performance/mainthread-work-breakdown/>)

Avoid large layout shifts

Result: 3 layout shifts found

Why: Lighthouse reported 3 layout shifts found for this audit, indicating that this check did not meet the recommended threshold.

How to fix: These are the largest layout shifts observed on the page. Each table item represents a single layout shift, and shows the element that shifted the most. Below each item are possible root causes that led to the layout shift. Some of these layout shifts may not be included in the CLS metric value due to [windowing](https://web.dev/articles/cls#what_is_cls). [Learn how to improve CLS](<https://web.dev/articles/optimize-cls>)

Affected Element:

Evidence: 3 layout shifts found

- `section#comp-ih3883fm > div.Ak0vpt > div#mediaiskgjyud1 > div`
- `section#comp-ih3883fm > div.Ak0vpt > div#mediaiskgjyud1 > div`
- `section#comp-ih3883fm > div.Ak0vpt > div#mediaiskgjyud1 > div`

Best Practices — 77/100

Uses third-party cookies

Result: 2 cookies found

Why: The page is using third-party cookies that may be restricted or blocked by modern browsers.

Affected Element:

- https://engage.wixapps.net/chat-widget-server/renderChatWidget/index?pageId=masterPage&compId=comp-jqqppefn&viewerCompId=comp-jqqppefn&siteRevision=33&viewMode=site&deviceType=mobile&locale=en&tz=America%2FPhoenix*&ionalLanguage=en&width=0&height=0&instance=5LubvGPhquZ_58tI.eYJpbN0YW5zJulKIjoiMmExNDA4ZDKtNWVjZi00NTYzLWIiNDITZTE4Yjc1NDMxZjdhdHlwZXBwRGVmSWQioiXNDUxN2UxYS0zMmYwLWFMOTgtNDA4ZS0yYmQ2OTUzYz d94f-4d45-b22d-2233ff7817c3%7C1%22%2C%22siteRevision%22%3A%2233%22%2C%22renderingFlow%22%3A%22NONE%22%2C%22language%22%3A%22en%22%2C%22locale%22%3A%22en-us%22%2C%22BSI%22%3A%22101dd5ba-d94f-4d45-b22d-2233ff7817c3%7C1%22%7D&tRoute=.%2F&vsi=00bd5f9d-434d-48e9-8f1a-fac1e0e1f4aa
- <https://engage.wixapps.net/api/chat-web/v1/real-time-tokens>

Why: Lighthouse identified an issue with this page.

Responsive — 70/100

Why: The document is 980px wide while the mobile viewport is only 375px wide. This can cause horizontal scrolling, clipped content, or elements extending outside the screen. Affected elements: `div#pageBackground_jt80h` (605px overflow), `div#bgLayers_pageBackground_jt80h` (605px overflow), `div` (605px overflow), `div#bgMedia_pageBackground_jt80h` (605px overflow), `div#site-root` (605px overflow), `div#masterPage` (605px overflow), `header#SITE_HEADER` (605px overflow), `div` (605px overflow), `djv` (605px overflow), `djv` (605px overflow)

Horizontal overflow on Tablet

Why: The document is 980px wide while the tablet viewport is only 768px wide. This can cause horizontal scrolling, clipped content, or elements extending outside the screen. Affected elements: `div#pageBackground_jt80h` (212px overflow), `div#bgLayers_pageBackground_jt80h` (212px overflow), `div` (212px overflow), `div#bgMedia_pageBackground_jt80h` (212px overflow), `div#site-root` (212px overflow), `div#masterPage` (212px overflow), `header#SITE_HEADER` (212px overflow), `div` (212px overflow), `div` (212px overflow), `div` (212px overflow)

How to fix: Inspect the affected elements and remove fixed widths that exceed the viewport. Use responsive widths, max-width: 100%, flexible layouts, responsive images, and appropriate CSS media queries.

Performance — 16/100

Largest Contentful Paint

Why: The main visible content is taking 14.1 s to appear. A slow Largest Contentful Paint usually means the main image, heading, or other large element is loading too late.

How to fix: Optimize the main hero image, use WebP or AVIF, preload the LCP resource when appropriate, reduce render-blocking resources, and defer non-critical JavaScript.

Result: 6.140 ms

Why: The browser is spending too much time executing long JavaScript tasks (6,140 ms). This delays user interaction.

How to fix: Reduce JavaScript execution, remove unused JavaScript, split large bundles, defer non-critical scripts, and reduce third-party JavaScript.

Result: 1.096

Why: Page elements are moving unexpectedly during loading (1.096). This can make the page difficult to use and can cause accidental clicks.

How to fix: Reserve space for images and advertisements, define width and height for media, avoid inserting content above existing content, and stabilize fonts before rendering.

Speed Index

Result: 4.5 s

How to fix: Optimize above-the-fold images, reduce render-blocking resources, inline critical CSS, and defer non-critical assets.

Result: Est savings of 17 KiB

How to fix: A long cache lifetime can speed up repeat visits to your page. [\[Learn more about caching\]](#)

Affected Element:

- ## Layout shift culprits

How to fix: Layout shifts occur when elements move absent any user interaction. [Investigate the causes of layout shifts]

Duplicated JavaScript

Issues were logged in the `Issues` panel in Chrome Devtools

Why: Lighthouse identified an issue with this page.

How to fix: Issues logged to the `Issues` panel in Chrome Devtools indicate unresolved problems. They can come from network request failures, insufficient security controls, and other browser concerns. Open up the Issues panel in Chrome DevTools for more details on each issue.

Responsive — 70/100

Page: <https://www.tagteamsigns.com/>

Horizontal overflow on Mobile

Why: The document is 980px wide while the mobile viewport is only 375px wide. This can cause horizontal scrolling, clipped content, or elements extending outside the screen. Affected elements: `div#pageBackground_jt80h` (605px overflow), `div#bgLayers_pageBackground_jt80h` (605px overflow), `div` (605px overflow), `div#bgMedia_pageBackground_jt80h` (605px overflow), `div#site-root` (605px overflow), `div#masterPage` (605px overflow), `header#SITE_HEADER` (605px overflow), `div` (605px overflow), `div` (605px overflow), `div` (605px overflow)

How to fix: Inspect the affected elements and remove fixed widths that exceed the viewport. Use responsive widths, max-width: 100%, flexible layouts, responsive images, and appropriate CSS media queries.

Horizontal overflow on Tablet

Why: The document is 980px wide while the tablet viewport is only 768px wide. This can cause horizontal scrolling, clipped content, or elements extending outside the screen. Affected elements: `div#pageBackground_jt80h` (212px overflow), `div#bgLayers_pageBackground_jt80h` (212px overflow), `div` (212px overflow), `div#bgMedia_pageBackground_jt80h` (212px overflow), `div#site-root` (212px overflow), `div#masterPage` (212px overflow), `header#SITE_HEADER` (212px overflow), `div` (212px overflow), `div` (212px overflow), `div` (212px overflow)

How to fix: Inspect the affected elements and remove fixed widths that exceed the viewport. Use responsive widths, max-width: 100%, flexible layouts, responsive images, and appropriate CSS media queries.

UI / UX Analysis

https://www.tagteamsigns.com/

UI/UX Issue

Severity: Critical

Dark gray paragraph text is placed directly over a bright red background in the 'OUR MISSION' section, making the body copy almost impossible to read and failing WCAG AA color contrast standards.

Recommendation: Change the paragraph text color to white (#FFFFFF) to establish strong visual contrast against the red background.

SIGNS DESIGN BUILD INSTALL

OUR SERVICES

WHO WE ARE

We are a Full Service Sign Company with Over 20 Years in the Industry.

We specialize in Commercial Building Signs, Storefront Signs and Monument Signs!

- Pan Channel Letters
- Reversed Pan Channel Letters
- LED Illumination
- Monument & Pole Signs
- Sign Cabinets
- Sign Service and Repair
- National Accounts
- Permit Processing
- Licensed, Bonded and Insured

Give us a call today for a Free Estimate!

OUR WORK

Discover how TagTeamSigns is your best resource for creative, quality sign solutions. Our highly trained staff is committed to give you exceptional customer service. From start to finish, you'll see how we make the most out of the latest technologies to design, create and install virtually any type of sign. We streamline the sign buying process for you from Concept to Completion.

OUR MISSION

UI-001

TagTeamSigns was established in 2001 to make the process of purchasing high quality, cost effective signs available to everyone. When you work with TagTeamSigns you'll find your expectations met or exceeded. You'll find us professional and proactive in all of our practices. You'll be impressed with our efficient systems, use of technology and competitive pricing. From start to finish TagTeamSigns provides complete project management, designed with each clients unique needs in mind. This has made TagTeamSigns one of the most respected sign companies in Arizona for the past 20 years.

UI/UX Issue

Severity: High

The prominent hero header features bold headline text but completely lacks a primary Call-to-Action (CTA) button above the fold, forcing users to scroll without direction.

Recommendation: Insert a high-contrast primary CTA button (e.g., 'Get a Free Quote' or 'Contact Us') directly beneath the hero headline text.

UI/UX Issue

Severity: High

The 'OUR SERVICES' section displays four small circular icons with no visible text labels, leaving users unable to identify what specific services are offered without interaction.

Recommendation: Add explicit text titles below each service icon (e.g., Design, Fabrication, Installation, Repair).

OUR WORK

Discover how TagTeamSigns is your best resource for creative, quality sign solutions. Our highly trained staff is committed to give you exceptional customer service. From start to finish, you'll see how we make the most out of the latest technologies to design, create and install virtually any type of sign. We streamline the sign buying process for you from Concept to Completion.

OUR MISSION

TagTeamSigns was established in 2001 to make the process of purchasing high quality, cost effective signs available to everyone. When you work with TagTeamSigns you'll find your expectations met or exceeded. You'll find us professional and proactive in all of our practices. You'll be impressed with our efficient systems, use of technology and competitive pricing. From start to finish TagTeamSigns provides complete project management, designed with each clients unique needs in mind. This has made TagTeamSigns one of the most respected sign companies in Arizona for the past 20 years.

UI/UX Issue

Severity: Medium

Red bullet point text in the 'WHO WE ARE' section is laid over a light, busy background image, causing poor legibility and eye strain.

Recommendation: Change bullet text color to dark gray/black and add a solid or opaque light background container behind the text block.

UI/UX Issue

Severity: Medium

The header navigation links are small and rendered in thin white font on a bright red background, making them difficult to scan and click quickly.

Recommendation: Increase font size to at least 16px, apply medium/bold weight, and increase tap/click targets with generous padding.

UI/UX Issue

Severity: Low

The site footer shows a copyright year of 2020, which can negatively impact trust signals and suggest an unmaintained website.

Recommendation: Update the copyright notice dynamically using JavaScript/backend logic to display the current year.
